

Bibek Dhakal

Associate AI / Machine Learning Engineer

Kathmandu, Nepal | imbibek8366@gmail.com | linkedin.com/in/bibek-dhakal-771ba5334 | github.com/Bibek-Dhakal

SUMMARY

Entry-level ML engineer with about one year of cumulative software engineering experience (internships and contracts, 2023–2025), plus an ML internship and an ML apprenticeship in 2026. Focused on honest evaluation (baselines, leakage-safe validation) and on turning models into tested, containerized services. **Seeking:** a full-time Associate / Junior ML Engineer or AI Engineer role on a team where I can contribute to real systems and grow long term. Available immediately.

EXPERIENCE

AI / ML Engineering Intern, FlyRank AI

Jul 2026 – Sep 2026

- Built a CTR opportunity-scoring model that ranks web pages for SEO metadata review; queried a ~78.8M-row Parquet warehouse with DuckDB and modelled on a 30k-row anonymized slice.
- Compared a hand-written rule, Logistic Regression and Random Forest on a client-holdout split: Random Forest reached Precision@50 of 0.64 vs. 0.26 for the rule (random chance 0.29).
- Showed a random split overstated performance (0.94 vs. 0.64 on unseen clients) and planted two deliberate leaks to confirm the validation caught them; published a research paper with limitations.

Data Science & ML Apprentice, Skill Shikshya

Apr 2026 – Jun 2026

- Studied ML mathematics, classical ML and deep-learning fundamentals; built ML applications served with FastAPI and containerized with Docker; completed and defended a final project.

Software Engineering: Internships & Contracts (alongside BCA)

Intermittent, 2023 – 2025

- Walkers Hive** (Intern, Oct–Dec 2025): designed and built the AcademiaOS MVP with a FastAPI and Celery backend, Next.js frontend, HTTP-only cookie auth and role-based access control, deployed with Docker.
- Nextwave Technology** (Contract, Apr–Jul 2025): shipped Flutter features and fixes and supported a Google Play Store launch; migrated corporate websites to Next.js.
- Walkers Hive** (Contract, Nov 2024–Apr 2025): built an e-commerce admin panel (React, MUI, Redux-Saga) and Next.js frontends integrated with PHP backends.
- CodSoft** (Android Development Intern, Dec 2023–Jan 2024): built Flutter apps with Firebase Authentication, local persistence and BLoC state management.

PROJECTS

StatTest-Pro | Python, SciPy, Statsmodels, Pytest, PyPI

GitHub

- Engineered an A/B testing Python SDK natively halting invalid tests on Sample Ratio Mismatch (SRM) anomalies ($p < 0.01$); published to PyPI with automated CI/CD semantic versioning.

DataMart-Flex & CohortLTV-Engine | DuckDB, SQL, Power BI, DAX

DataMart-Flex | CohortLTV-Engine

- Built automated DuckDB ETL pipelines computing complex SQL window functions across 1M+ rows in ~174ms, dynamically transforming raw mock transactions into verified Star Schemas.

FlowTrace & TabTrace | Prefect, MLflow, Pandera, GitHub Actions

FlowTrace | TabTrace

- Orchestrated Prefect DAG ML pipelines natively halting on data leakage/schema failures via Pandera. Tracked complete lineage in MLflow linking models to SHA-256 data hashes.

ModelGate & ServeScale | Kubernetes, ONNX Runtime, FastAPI, Docker

ModelGate | ServeScale

- Scaled ONNX INT8 quantized models on Kubernetes with zero dropped requests during live rollouts. Published a PyPI SDK enforcing strict JSON schema bounds to prevent stack trace leaks.

SKILLS

Languages: Python, SQL, TypeScript, Dart

ML & AI: PyTorch, scikit-learn, XGBoost, ONNX Runtime, Transformers, SciPy, Statsmodels

Data Engineering & BI: DuckDB, Pandas, SQLite, SQLAlchemy, Power BI, DAX

Backend & MLOps: FastAPI, Docker, Kubernetes, MLflow, Prefect, Pydantic, Pandera, GitHub Actions

EDUCATION

Bachelor of Computer Application (BCA), Tribhuvan University, Nepal

Completed Aug 2026

CERTIFICATIONS

FlyRank AI Machine Learning Internship | Skill Shikshya Data Science & ML Diploma | Anthropic Academy: Building with the Claude API, Claude in GCP & AWS Bedrock, Claude Code in Action, MCP Advanced Topics | Kaggle: Pandas, Feature Engineering, Intro & Intermediate ML
